### **About LSI ...**

Light and Sound Interactive is a unique international conference and expo exploring light- and sound-based technologies and their creative applications in dynamic fields such as virtual and augmented reality, games, cinema, music, audio, imaging, displays, healthcare, optics, photonics, and more.

### **About Rochester ...**

Known as the Imaging Capital of the World, Rochester New York is the birthplace of imaging giants Eastman Kodak, Xerox, and Bausch + Lomb. Today there more than 120 innovative optics, photonics, and imaging companies, a vibrant music community, and two major research universities with leading programs in optics, photonics, imaging, audio, music, healthcare, cinema, games, and interactive media.
